

Vario Chief

Flexible suction power

This mobile suction system will enable you to apply suction where and when the need for temporary suction power arises in your production line. The Vario Chief is suitable for 1 to 2 suction points.

The unit has an automatic cleaning system, operates quietly and is easily movable. The Vario Chief is ideal for the suction of skins or dust coming from onions and can be used wherever needed.

Mobile suction

for onion and potato processing

JDC has several solutions for the (temporary) suction of dust or skins associated with agricultural products. In other words, there is always a system that caters perfectly to your needs! Do you require more information on our mobile suction units? Please contact us by phone on 208 577 5375. Or visit jdceextraction.com for more information.

Summary of our mobile unit

Type	kW	ft ³ /hr	filters	waste	Ø	sizes (l x w x h)
